EXPERIENCE

SOFTWARE DEVELOPER | ATATECHNOLOGY LLC

April 2012 – August 2016

Started and actively involved in the development of a large HRM project. Implemented Payroll, Vacation, Sick leaves etc. modules.

Maintenance of existing SMPP protocol. Developed an MS Excel add-in that interacts with API, processes 50k+ rows and sends bulk SMS.

SOFTWARE DEVELOPER | BETHCLIP (start-up)

March 2013 – August 2015

Developed WPF-based Windows application using C#. I used various techniques to capture a user's clipboard. Integrated API to exchange clipboard data across devices.

SIDE-PROJECTS

OOPSpam Anti-Spam API / <https://oopspam.com/>

2017 - current

An anti-spam API service with active customers. Built the API in Java and deployed on Heroku. The backend uses machine learning algorithms, text analyses, etc.

Little Eye / <https://wearelittleeye.com/>

2018

Founded web studio with my partner. Integrated Braintree payment system. Build websites for customers. Install and configure Nginx web server and TLS.

Split-Up Tab Manager /

<https://github.com/onaralili/SplitUp>

2017

A browser extension to manage tabs for Chrome & Firefox. Used Browser API, JavaScript.

SKILLS

C#	sufficient
Node.js	sufficient
RDBMS	sufficient
JavaScript	sufficient
HTML / CSS	proficient

EDUCATION

COMPUTER SCIENCE (master)

University of Rome La Sapienza

Thesis title: An advanced Visual Analytics system for Attack Graphs: visualizing the internal state of nodes

AWARDS

1st place

Barama HackDay

March 2016

As a team of 3, we developed a web-based data analysis tool using .NET Framework. The tool takes JSON, XML, CSV as the data source, analyzes it and provides detailed graphs. It helps market researchers to target right customer.

2th place

Hackathon Azerbaijan

March 2013

Developed in C#, a mobile interactive map application for Windows Phone. Used XAML for map and implemented interaction between UI and XML data.
